About

GitSimple is a DevSecOps solutions firm specializing in GitLab and JFrog, providing professional services such as implementation, migration, customization, training, and license management to federal agencies and industries with high compliance requirements. Our Top Secret-cleared team consists of DevSecOps experts ready to add value to agency missions.

Core Competencies

- DevSecOps processes and AI enablement
- CI/CD pipeline customization
- Software security management
- License acquisition and management
- GitLab training
- Software platform integrations

Differentiators

- Full Environment Services – GitSimple offers end-to-end software development lifecycle support. From infrastructure to customization, and security to training, we have the experience to help advance your mission.
- Experience and certifications – The GitSimple team are experts in GitLab, JFrog, Atlassian, and other standard tools. We have certifications in DevSecOps, agile, and SAFe processes, and expertise in FedRAMP, HIPAA, and FISMA frameworks.

Past Performance

- **USSF:** Built, tested, and released systems for tracking and managing rocket launches. Used COTS products, including Atlassian, GitLab, JFrog, and more to track and manage software deployments.
- **USAF ACC:** Provided support for large onprem deployments for DevSecOps tools. Modified and updated DevSecOps tools to meet multiple Air Force requirements.
- **USAF Platform One:** Provided container hardening and DevSecOps support for multiple applications, including GitLab, Atlassian, JFrog, and Anchore.
- **US Army USASOC:** Developed and refined processes for the US Army for deployments and vehicle maintenance utilizing DevSecOps tools such as GitLab and Atlassian.
- **HHS CMS (Medicare & Medicaid Services):** Implemented integrated DevSecOps tools across the Innovation Center (IC) and multiple CMS programs. Handled reviews with the TLC.
